Enriching the power of LMS with
Virtual Classroom

Moodle – Big Blue Button Integration

Meet and collaborate online with your training and development team, clients, and partners regardless of geographical limitations.

For Academic Institutions

➔ Online lectures and lesson presentations

A video conferencing introduces an interactive way of learning among the students with more engagement towards the lesson. **In-built polling** allows learners to share feedback in real-time along with chat and file sharing among colleagues.

➔ File sharing

Sharing the learning resource in form of PPT / DOCX / PDF during the session will help in focussed discussion during the lesson.

➔ Online meeting and Chats

It is an easy ways to host online meeting and webinar for effective collaboration among the staff members with organizational branding. Public chat and private chat options are also available for efficient collaboration.

➔ Record Lessons for Review

Recorded sessions help students to review the portion or full lesson as a refresher or if they were absent for the lesson.

➔ Invitation for Guest Lecture

Bring in the subject matter expert from outside in to the virtual classroom session with one click-meeting.

➔ Whiteboard

Brainstorming ideas and innovation over the virtual whiteboard by bringing in a classroom feeling among the students. Even you can save the Whiteboard discussion for later review and analysis.

For Corporate Businesses

→ Online Training

Whether you are an employee or client, you can easily login to a virtual meeting on one-click.

→ Online Support

If you have a stable internet connection, you can simply provide support from anywhere.

→ Project Meeting

Check in with your team or client during a video conference project meeting

→ New Product Launch

When a new product goes live then a web meeting allows you to go online and educate your customer and employee's about the new launch.

→ Online Presentation

Give a structured presentation to the employee's, clients and delivery partners.

→ Online Polling

Feedback and suggestion for training and development is possible with the in-built polling options.
